Frequently asked questions on Statistics Canada’s recent changes to website

Data tables

• How do I find the data I am used to getting from the previous website?
• How are data organized and presented on the site?
• Where are the CANSIM tables?
• Where are the Summary Tables?
• How have the table titles changed?
• How has the data presentation changed from CANSIM?
• Where did the footnotes at the bottom of the CANSIM tables go?
• Which data download options are available?
• Are less data available to the public?
• Where did the CANSIM manipulate feature go?
• Is there a plan to offer dynamic charts and thematic maps?
• Are the data available through Open Government affected by changes to the Statistics Canada website?
• Are any new services being offered?

Searching and finding information

• Are there any improvements to search?
• Can I still find data using vectors?
• How do I find data for a particular region or area?
• Where are the data publications?
• Where can I find articles, periodicals, in-depth publications or reports?
• Where can I find related information about a product?
• What if I have questions or comments?

In the news | The Daily

May 9, 2018
Building permits, March 2018
The value of building permits issued by Canadian municipalities increased 3.1% to $8.4 billion in March, following a 2.8% decline in February. The rise was mainly the result of higher construction intentions for multi-family dwellings, particularly in Quebec and British Columbia, and, to a lesser extent, by the commercial component.

**Data tables**

How do I find the data I am used to getting from the previous website?

New products links redirect users from bookmarked content to the equivalent new content. Old catalogue product numbers and CANSIM table numbers are searchable and link to the latest content. As well, all site content, new and old, is available through the site search. A concordance table between old CANSIM table numbers and new table numbers is available online. Videos are available for users to help them navigate the website and find the information they need. What's new on our website and How to use the data tables.

How are data organized and presented on the site?

Statistics Canada data can be accessed under the subjects, data, geography, census program and surveys and statistical programs sections. They have been organized by sub-category, including tables and profiles. Data tables now offer a consistent presentation across all subjects.

Where are the CANSIM tables?

CANSIM tables have been replaced by data tables with the same or similar content that have a consistent presentation and that will be dynamically updated as new results are released.

You can find a former CANSIM table by using the "Filter results by keyword(s)" option to type the number of the corresponding data table (e.g. 282-0023 and not CANSIM 282-0023). Redirects have also been implemented from former content to the equivalent new content. A concordance table between old CANSIM table numbers and new table numbers is available online.

Where are the Summary Tables?

Summary tables have been replaced by data tables with the same or similar content that have a consistent presentation and that will be dynamically updated upon the release of new results. For our most commonly used tables, redirects have been implemented from former content to the equivalent new content.

How have the table titles changed?

Simpler titles provide greater clarity about the primary focus and components of the table. Users can find additional information in the table descriptions.

How has the data presentation changed from CANSIM?

Each table is initially presented with drop-down filters that allow users to quickly navigate to the data points of interest. Further customization is possible using the Add/Remove data button. Users also have the option to pivot table rows and columns, using the customize layout button.

Where did the footnotes at the bottom of the CANSIM tables go?

Users are able to click on a note in a table to see the note content displayed as an overlay. When customizing a table, notes are now renumbered automatically. If the download as displayed function is used, all the notes will appear at the bottom of the table. When users download the entire dataset, all notes are provided in a separate metadata file which downloads along with the data file.

Which data download options are available?

Users are able to download data in different output formats. On the website, users have the option to download data as displayed on the screen, download an entire table or receive information through web data services. In terms of output formats to download an entire table, Statistics Canada is moving away from proprietary output formats (like Beyond 20/20/4T format) to support non-proprietary, open, output formats such as CSV or SDMX.

A screenshot of a webpage showing employment generated by tourism. The data table includes columns for different activities such as tourism activities, total tourism industries, transportation, and accommodation, among others, with data for Q4 and Q1 of 2016, 2017, and Q3 of 2017 and 2018.

Related information:
- Source (Surveys and statistical programs)
- Subject and keywords
The tourism employment series are reduced to the following industries: Air transportation, Other transportation, Accommodation, Food and beverage services, Recreation and entertainment, Travel services, and Other (non-tourism) industries.

Other transportation includes rail, water, bus, taxi and vehicle rental.
### Employment generated by tourism (x 1,000)²

**Frequency:** Quarterly  
**Table Code:** 36-10-0212-01 (formerly CAN/ISM 1,1,1,5,5-GU)

North American Industry Classification System (NAICS) Canada

Classifications: 12-501X
Description: This classification system is used for organizing economic data by industry, and is used by Canada, Mexico and the United States. The North American Industry Classification System (NAICS) Canada 2017 version 2.0 supersedes NAICS 2012. NAICS is revised on a five-year cycle in order to ensure that the classification continues to reflect the changing structure of the economy. NAICS Canada 2017 version 2.0 groups economic activity into 20 sectors and 623 Canadian industries.
Frequency: Occasional
Available formats: HTML, PDF, Paper (discontinued), CD-ROM (discontinued), Deltatek (discontinued)
